## EDUCATION

### Santa Clara University

Santa Clara, CA

B.S. in Computer Science, Minor in Graphic Design

Expected June 2026

- Emphasis: Software Engineering; GPA: 3.64
- Relevant Coursework: Algorithms & Data Structures, Object-Oriented Programming

## SKILLS

Programming Languages: Python, C/C++, HTML/CSS, Javascript, React.js, Node.js

Technical Skills: Git, Linux, Adobe Photoshop/Illustrator, Figma, Canva, Microsoft Office

Languages: Korean (conversational), Chinese (elementary), Indonesian (elementary)

## EXPERIENCE

### EPIC IoT Dashboard

Oct 2024 - present

Software Engineer, Front-End

React.js, Node.js

- Developed and integrated device management features for an agricultural dashboard using React.js and Node.js, streamlining equipment monitoring and farm operations
- Led UI/UX design initiatives using Figma, creating an intuitive and responsive dashboard interface that enhanced user experience and operational efficiency

### HoneyBuddy - Design-a-thon Winner

Jan 2025

Front-End Designer

Figma, Adobe Illustrator

- Designed a wellness app to help college students build healthy habits; prototyped app using Figma to demonstrate core features and usability; created custom app icon in Adobe Illustrator to enhance branding and visual appeal
- Presented the app to industry professionals, showcasing design and functionality; awarded “Best User Interface” prize out of 100+ competing teams

### Make-Your-Own Haiku

Sept 2024 - Dec 2024

Individual Project

HTML/CSS, Javascript, Node.js

- Engineered an interactive web application featuring a digital “magnetic poetry” interface that generates haikus through draggable word elements styled as refrigerator magnets
- Implemented advanced functionality including syllable-aware drag-and-drop constraints and dynamic word set navigation, sourcing content from an external dictionary database

### WebCrack - Hackathon Finalist

Feb 2024

Front-End Developer

Javascript, HTML/CSS, React.js

- Programmed a Google Chrome extension using JavaScript, React.js, LangChain, and the ChatGPT API to detect bias in articles, enhancing media literacy for ESL students
- Developed brand identity through custom logos & animations in Procreate and designed product website using HTML/CSS, and Figma, contributing to its selection as finalist among 40+ teams

## LEADERSHIP

### Daybreak KPOP Dance Crew

Santa Clara, CA

Co-Chair, Events Coordinator

Sept 2022 - present

- Facilitated the planning and execution of annual showcase with over 300 attendees
- Improved team morale, driving a 200% membership increase
- Coordinated performances and cover filmings, amassing over 33K total views
